## **SOPHISTICATED. SENSUOUS. STRONG.**

Millions of years ago the Earth was a highly volatile environment. Under extremely high temperatures and enormous pressure, layers of limestone were transformed into dolomite, a rock that is very hard and durable.

Welcome to the Cosmopolitan Collection. Where natural minerals, science and artistry are combined to produce design-savvy products that will satisfy tastes traditional, transitional and contemporary. Bathroom tubs, sinks and shower bases that are beautiful, functional and durable. Cast Engineered Stone, with a chemically-bonded luxe finish.

**MARICELA** ♦ 72" in length

**MARICELA SR** ♦ Semi-recessed sink 22" X 14"

**CENTRAR** ♦ Center drain shower base • available in multiple sizes

## THE MATERIAL

Cosmopolitan Collection products are molded using a high-quality mineral composite mixture of ground natural elements and high-grade binding agents, with a tough, state-of-the-art chemically-bonded luxe finish specially formulated for MTI. The same type of material used on the hulls of multi-million-dollar luxury yachts. Each is then hand-finished for the final touch.

The result is a beautiful line of products that are non-porous, durable and impact/shock-resistant with high insulating properties. They are also UV-, stain-, mold- and mildew-resistant, making them easy to clean and maintain.

## COLORS & FINISHES

Cosmopolitan tubs and sinks are manufactured with a white glossy finish, and can be optionally ordered with an exterior matte white, matte gray or matte black finish to match Cosmopolitan shower bases.

## THE PROCESS

 MTI's mineral composite material consists of organic dolomitic limestone, a rock that is very hard and durable.

 The ground minerals are combined with a high-grade casting resin, or binding agent.

 The mixture is liquefied and poured into a mold that has been prepared with a thick coating specially formulated for MTI.

 In the curing process, the two are chemically bonded.

 This cast stone product is then hand finished.

 The non-porous, thick, hard surface contains high-performance properties that make it UV-, stain-, mold-, mildew- and impact-resistant.

 Durable and easy to clean and maintain.

## HYDROTHERAPIES

### Soaking Bath

The most elemental form of hydrotherapy is the soaking bath, where heat and water's natural buoyancy foster deep relaxation. All MTI soaking tubs are ergonomically designed for maximum comfort, and our mineral composite material helps keep bath water warm longer.

### Air Bath

The blissful combination of water, heat and air movement creates an incomparable effect that is as therapeutic as it is relaxing. The movement of millions of tiny air bubbles contacting the skin activates the lymphatic system, increases blood flow, stimulates endorphins and relieves sore muscles and other painful ailments. Air flow can be adjusted from soft to stimulating.

TUBS

MTI's Cosmopolitan Collection includes freestanding tub models in a variety of styles that will appeal to a broad range of design preferences.

Available as a soaker or air bath, Cosmopolitan Collection tubs feature ergonomic interior designs and high insulating properties to keep water warm longer for extended relaxing soaks and a full-body hydrotherapy experience.

All are produced exclusively in mineral composite material. They are beautiful, non-porous, durable and easily maintained.

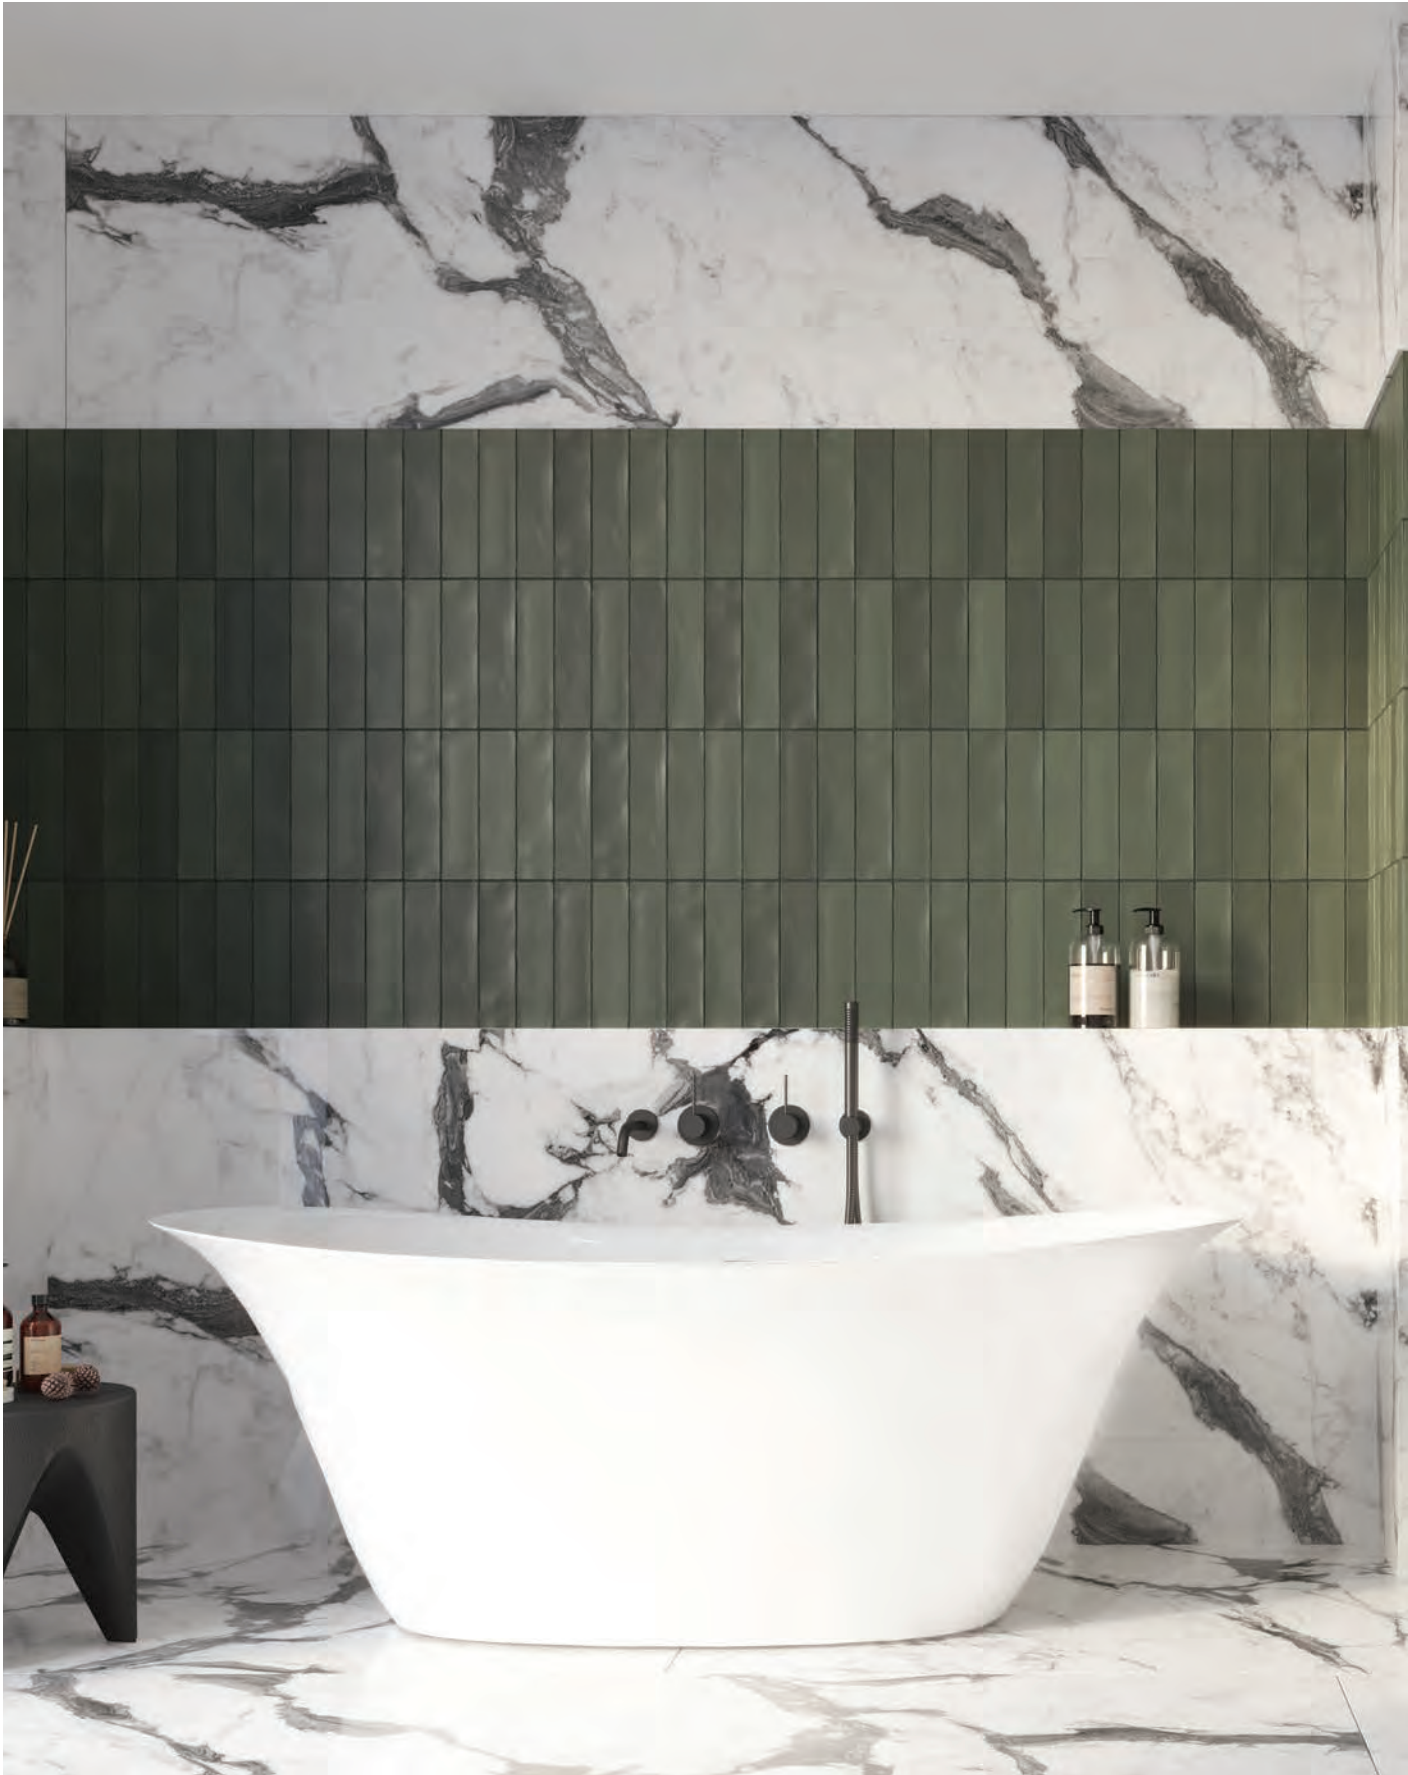

MAGDA ♦ 66" in length

**CHARLOTTE** ♦ 2 models available from 58" to 66" in length

**MARICELA** ♦ 72" in length

**TAYLA** ♦ 66" in length

**ALMAZA** ♦ 59" in length

**ISLITA** ♦ 66" in length

**WALKER** ♦ 62" in length ♦ Shown with black matte exterior

**HAMILTON** ♦ 2 models available from 58" to 66" in length

**HUDSON** ♦ 66" in length

**JAMES** ♦ 59" in length

**MARCEL** ♦ 66" in length

## SHOWER BASES

The Cosmopolitan Collection includes several beautiful styles of shower bases in multiple sizes, natural stone textures and a palette of colors produced exclusively in mineral composite. All are low-profile multiple-threshold -- they can accept glass enclosures on multiple sides. This design presents a very clean look while making entrance and exit easier. Their shallow threshold height also allows them to be recessed in the floor for a zero-barrier installation.

Cosmopolitan Collection shower bases are shower floors reimagined. Manufactured in Spain, a country recognized world-wide for its production of excellent tile, think of these shower bases as one large slab of tile. Factory-applied tile flanges enable easy, waterproof installation. One-piece solid construction means no grout to replace and re-seal on a regular basis. And the non-porous, shock-resistant surface is UV- and stain-resistant for durability and easy care.

**LADO** ♦ End drain shower base in black with Lastra texture

Available in multiple sizes

**SANDLIN 1** ♦ Vessel style sink 16" X 5"

**CENTRAR** ♦ Center drain shower base in gray with Pizarra texture • available in multiple sizes

**LADO** ♦ End drain shower base in gray with Lastra texture • available in multiple sizes

**LADO** ♦ End drain shower base in white with Lastra texture • available in multiple sizes

**ARTESA** ♦ Trough end drain shower base in white with Pizarra texture • available in multiple sizes

SINKS

The Cosmopolitan Collection offers a variety of bathroom sinks in different styles, shapes and textures. Vessel and semi-recessed models are designed to either mimic or complement Cosmopolitan Collection tub designs.

All sinks are produced using the same mineral composite material and process as tubs in the Collection, resulting in vessels that are beautiful, durable and easy to maintain.

MICHELINA ♦ Vessel style sink 24" X 14"

**JAMES** ♦ Vessel style sink 24" X 16"

**MARICELA SR** ♦ Semi-Recessed sink 22" X 14"

**MARICELA** ♦ Vessel style sink 24" X 14"

**SANDLIN 1** ♦ Vessel style sink 16" X 5"

**MONICA** ♦ Vessel style sink 24" 14"

**SANDLIN 2** ♦ Vessel style sink 17" X 8"

**TAYLA** ♦ Vessel style sink 17" X 10"
