

MTI Design Studio

CAPABILITIES & SCOPE

## ART AND ARCHITECTURE

### The Bath as Art®

More than producing vessels for the bathroom, MTI excels at creating works of art. Tubs and sinks become indispensable architectural elements that define a space. Thoughtful design that caters to the senses. Handcrafted quality that exudes luxury.

FROM SELECT SERVICE TO LUXURY PROPERTIES

## A Solution for Every Space

Among MTI's many strengths is a vast product range of tubs, sinks and shower bases offered in different materials. Combined with MTI's extensive customization capabilities, this versatility provides solutions that cover the full range of properties from select service to luxury, as well as casinos, condominiums and spas.

# Why Specify MTI

MTI Baths is a unique manufacturer that offers an expansive line of high-quality, innovative bath products: tubs, shower bases, sinks, Counter- and Vanity sinks in various materials. Here are some facts that contribute to our strong reputation and make us the preferred vendor for many clients.

## AWARD-WINNING DESIGNS

In the last two decades MTI has been recognized with over 160 national and international awards for design excellence and product innovation. Testimony to the MTI philosophy of design with purpose. MTI's in-house projects team is passionate about design and technically capable to assist with your product needs. Contact the Design Studio for assistance in concept development, product selection, custom designs, budgeting, installations or whatever else you may need.

## CUSTOMIZATION CAPABILITIES

MTI offers unparalleled flexibility and customization regarding design changes, hydrotherapy packages and the selection of options for increased comfort or easy installation. Full-service, whether custom designs, client-developed or client-commissioned.

## INDUSTRY EXPERTISE

The MTI Projects Team is very active in the hospitality industry and is familiar with the brands and evolving design trends. Approved by virtually every hotel chain worldwide, MTI can assist in specification within certain standards requirements.

## INSTALLATION SOLUTIONS

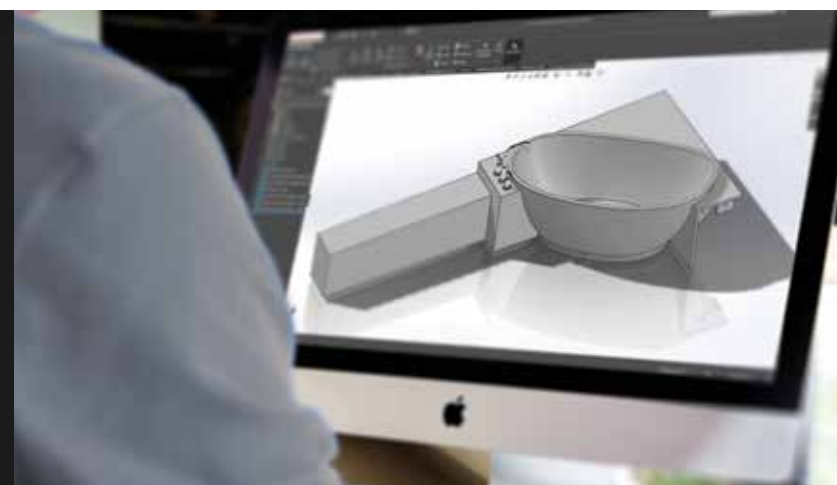

MTI offers engineering and installation assistance. Pre-leveling systems help to level and support shower pans or bath tubs. Wall brackets for sinks can be designed to hit precise stud locations. Custom molds available to meet size or drain requirements for large remodels.

## SELECTION OF MATERIALS

MTI offers a choice of materials to assist you in setting the right tone for the project and meeting your budget objectives.

## SELECTION OF MATERIALS

### SCULPTURESTONE®

Tubs / Sinks

**Engineered Solid Stone**  
Same Properties Throughout  
No coating. No reinforcement

Feel the difference with this mixture of finely ground natural minerals and high-performance resins that are liquefied, poured and hardened. Soft matte or hand-polished deep gloss finish.

### MINERAL COMPOSITE

Tubs / Sinks / Shower Bases

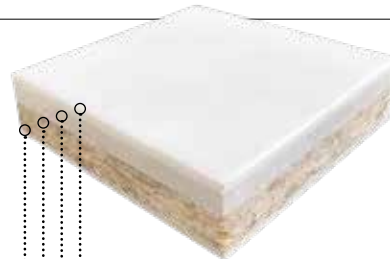

**Highest Grade Commercial Coating**  
Casting Resin & Dolomite Mineral Mixture

This material is made out of natural minerals bound together by a high-grade casting resin. The smooth, white glossy finish is provided by a high-performance polyresin coating specially formulated for MTI.

### DOLOMATTE®

Tubs / Shower Bases

**Solid Surface Slab**  
Resin/Fiberglass/Titanium Reinforcement  
Wood Support  
Resin/Fiberglass/Titanium Reinforcement

A solid-surface slab of specialty polymer blend that is consistent in color and properties with excellent performance characteristics. It is thermoformed and reinforced with a thick layer of fiberglass, resin and titanium, which also helps with heat retention. An exquisite matte finish with a velvety-soft touch and feel.

### ACRYLIC CXL®

Tubs / Shower Bases

**Acrylic Sheet**  
Resin/Fiberglass/Titanium Reinforcement  
Wood Support  
Resin/Fiberglass/Titanium Reinforcement

Cross-linked continuous cast acrylic is the finest in the world for bath applications. The glossy acrylic shell — uniform in thickness and consistent in color and properties — is thermoformed and reinforced with fiberglass, resin and titanium, which also helps with heat retention.

## THERAPIES FOR WELLNESS

### MTI Hydrotherapies

#### MTI AIR BATHS

- Tiny bubbles come from jets on the tub floor.
- Check valves let the hot air into the tub, but keep the dirty bathwater out of the air lines. Purge cycle keeps system dry and clean.
- Ideal for relaxation, circulation and detoxification with a light full-body massage.
- Available on almost all MTI tub materials and styles.

#### MTI WHIRLPOOLS

- Water jets and pump create therapeutic deep-tissue massage.
- MTI's patented cleaning systems quickly and thoroughly flush water and air lines, leaving the plumbing system clean and hygienic.
- Financial savings via housekeeping time and water savings.
- Exclusive to Acrylic CXL® and DoloMatte® drop-in, undermount and alcove tubs.

### MTI Sensory Therapies

#### CHROMATHERAPY

Uses adjustable digitally-controlled underwater LED colors to promote integrated holistic balance.

#### AROMATHERAPY

The power of pure essential oils can be diffused through the system integrated with MTI air baths.

#### THERMAL THERAPY

In-line water heaters will keep the water hot to extend the relaxation of a hot bath.

# TUBS

Freestanding / Drop-in / Undermount / Alcove

Offering a large assortment in different styles, sizes, shapes and installation types, MTI carries four tub collections serving all customer needs.

***Boutique Collection:*** High-end, design-savvy and handcrafted in Superior Solid Surface SculptureStone®.

***Cosmopolitan Collection:*** Eclectic assortment produced exclusively in high-quality mineral composite.

***Designer Collection:*** Premium in both style and quality, with the flexibility to personalize. Solid Surface DoloMatte® and Acrylic CXL® construction.

***MTI BASICS®:*** The perfect solution when needs are simpler and desires more modest.

MTI makes all types and levels of baths including freestanding, drop-in, undermount and skirted/alcove. We offer the finest luxury-level bathing experience for guest rooms, fully-equipped hydrotherapy tubs for spas, residences and suites, and we also offer simple designs for standard full-service and midscale projects as well as for secondary baths for condo projects. MTI can value engineer from our own line, selecting not only from the hundreds of MTI Baths, but also from our partner factories worldwide.

## SINKS

Vessel / Semi-recessed / Undermount / Wall-mount

MTI offers a variety of sink types, in different designs and sizes, manufactured in SculptureStone® or mineral composite. These are molded for the best price point and fastest lead time.

- Organic look and velvety-smooth feel.
- Engineered stone material.
- Matte or gloss finish available.
- Custom colors and molds available.

*Available in:*

*SculptureStone® • Mineral Composite*

## COUNTER-SINKS

Vanity mount / Wall-mount (ADA available) / Full Vanity

MTI Counter-Sinks are made with SculptureStone®. You may select custom length, depth and height; bowl style and position(s). These are fabricated to order, using a molded sink basin; slabs are poured to meet the custom dimensions. These parts are seamed together using the same material that forms the sink bowls and counter. The unit is then cured and hand-finished. This creates seamless integration and allows for customization on small orders.

For large custom orders, MTI can create a custom mold to allow for faster lead times and a better price point.

- Organic look and velvety-smooth feel.
- 100% solid material is non-porous, mold-resistant.
- Hand-polished deep gloss finish is also available.
- Custom wall carriers available.
- Contact MTI for assistance adjusting for ADA.
- Custom colors and molds available.

# SHOWER BASES

Alcove / Multi-threshold / Barrier-free

All MTI shower bases are commercial grade. Our selection of materials allow us to service a wide variety of property levels. Every MTI shower pan is non-porous for easy cleaning and each material is consistent in color, which allows for simple spot repairs and convenient maintenance. All meet or exceed slip-resistance certification requirements.

Available in:

Mineral Composite • DoloMatte® • Acrylic CXL® (matte or gloss)

## COLORS

### SculptureStone® Color Options

MTI SculptureStone tubs and sinks come standard with a Soft Matte or Hand-Polished Deep Gloss finish in two colors.

Contact the Projects team for more information on custom material colors.

Additionally, SculptureStone tubs and sinks with a flat rim are also available with a Matte or Gloss exterior finish in these colors.

### Mineral Composite Color Options

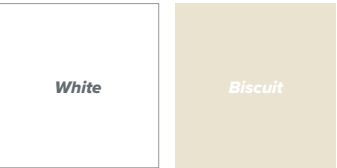

MTI's mineral-composite tubs and sinks come standard with a glossy white finish. Additionally, mineral composite tubs and sinks with a flat rim are also available with a matte exterior finish in the colors below.

Mineral composite shower bases are available in the three colors below.

### Acrylic CXL® and DoloMatte® Color Options

Acrylic tubs and shower bases are available in white or biscuit. DoloMatte tubs and shower bases are available in white only
