MTI Shower Bases:

**SHOWER FLOORS REIMAGINED**

Tiled shower walls are high in aesthetics, with many choices of colors and textures available. More recent design leanings indicate a trend toward shower walls of large tile, slabs and other material.

Consider using a different material for the shower floor: a one-piece constructed shower base. Easier to install, easier to clean, more hygienic and requires no high maintenance of regular grout replacement and resealing for the floor.

**MTI offers these shower bases in 3 different materials:**

**MINERAL  
COMPOSITE**

Cast engineered stone mineral composite.

**DOLOMATTE®**

Velvety-soft thermoformed solid surface DoloMatte®.

**ACRYLIC  
CXL®**

High-gloss thermoformed Acrylic CXL®.

*Whether for residential or commercial,  
all three are the smart alternative.*

**LADO** ♦ End drain shower base in gray with Lastra texture • available in multiple sizes

## MINERAL COMPOSITE SHOWER BASES

The Cosmopolitan Collection includes several beautiful styles of shower bases in multiple sizes, natural stone textures and a palette of colors produced exclusively in mineral composite. All are low-profile multiple-threshold -- they can accept glass enclosures on multiple sides. This design presents a very clean look while making entrance and exit easier. Their shallow threshold height also allows them to be recessed in the floor for a zero-barrier installation.

- MTI's mineral composite material consists of organic Dolomite, a rock that is extremely hard and durable.
- The ground minerals are combined with a high-grade casting resin, or binding agent.
- The mixture is liquefied and poured into a mold that has been prepared with a thick coating specially formulated for MTI. The same type of material used on the hulls of luxury yachts.
- In the curing process, the two are chemically bonded.
- This cast stone product is then hand finished.
- Factory-installed with tile flange for easy, waterproof installation.
- The non-porous, thick, hard surface contains high-performance properties that make it UV-, stain-, mold-, mildew- and impact-resistant.
- Durable and easy to clean and maintain.

**LADO** ♦ End drain shower base in black  
with Lastra texture ♦ available in multiple sizes

**ARTESA** ♦ Trough end drain shower base in white with Pizarra texture • available in multiple sizes

**LADO** ♦ End drain shower base in gray with Lastra texture • available in multiple sizes

**ARTESA** ♦ Trough end drain shower base in gray with Pizarra texture • available in multiple sizes

**CENTRAR** ♦ Center drain shower base with Pizarra texture • available in multiple sizes

## DOLOMATTE® SHOWER BASES — ONLY FROM MTI

The Designer Collection includes shower bases that are manufactured in an innovative solid-surface material called DoloMatte. This true solid surface material offers luxurious design aesthetics characterized by an exquisite matte finish and a velvety-soft touch and feel.

Most DoloMatte shower bases are of low-profile multiple-threshold design -- they can accept glass enclosures on multiple sides. This design presents a very clean look while making entrance and exit easier. Their shallow threshold height also allows them to be recessed in the floor for a zero-barrier installation.

- Velvety smooth matte finish.
- DoloMatte begins as a thick, American-made solid-surface slab of specialty polymer blended with ground minerals that is consistent in color and property.
- After a preparation process, it is thermoformed with a mold, and the back is reinforced with a thick layer of fiberglass, wood, resin and titanium. The backing adds strength and structural integrity. The product is then hand finished.
- Factory-installed with tile flange for easy, waterproof installation.
- Durable and impact/shock-resistant.
- Extremely scratch- and stain- resistant.
- Consistent color throughout the thickness of this high-performance material provides a finish that is renewable for long-term beauty.
- The surface is non-porous, UV-, mold- and mildew-resistant, making cleaning and sanitizing faster and better.
- Most bases can even be equipped with MTI's Radiance®, which applies radiant heat to the shower base floor for extra comfort.

Low-profile multiple threshold trough end drain shower base • available in multiple sizes

Low-profile multiple threshold end drain shower base

Low-profile single threshold shower base with soft organic design • available in multiple sizes

## ACRYLIC CXL® SHOWER BASES

MTI Designer Collection offers shower bases manufactured in Acrylic CXL, the finest acrylic available in the world. Most of these shower bases are of low-profile multiple-threshold design -- they can accept glass enclosures on one, two or three sides. This design presents a very clean look while making entrance and exit easier. Their shallow threshold height also allows them to be recessed in the floor for a zero-barrier installation.

- High-gloss finish.
- Acrylic CXL™ begins with a sheet of high-gloss cross-linked continuous cast acrylic, the finest in the world. It is thermoformed and reinforced with a thick layer of fiberglass/resin/titanium to prevent flexing of the shower floor pan. The product is then hand finished.
- Factory-installed with tile flange for easy, waterproof installation.
- Durable and impact/shock-resistant.
- Extremely scratch- and stain- resistant.
- Consistent color throughout the thickness of this high-performance material provides a finish that is renewable for long-term beauty.
- The surface is non-porous, UV-, mold- and mildew-resistant, making cleaning and sanitizing faster and better.
- Most bases can even be equipped with MTI's Radiance®, which applies radiant heat to the shower base floor for extra comfort, and also in the seats of seated models.

Low-profile single threshold shower base with soft organic design • available in multiple sizes

Low profile multiple threshold trough drain shower base • available in multiple sizes

## ACCESSORIES FOR SHOWERS

Here are some products that will increase the appearance and enjoyment of your shower. Like MTI shower bases, they are made using the finest materials and require minimal maintenance.

### TEAK SHOWER SEAT

Inherently slip-resistant teak brings an organic element to the shower with its natural beauty and ability to ward off fungi, mold and mildew. Stainless steel frame with positive stop friction spring guide bracket holds seat in position. MTI uses only 100% legal, FEQ (First European Quality) sustainable teak lumber,

### TEAK BATH MAT AND SHOWER TRAY

Smooth, durable, slip-resistant teak combines beauty with practicality. Teak has the natural ability to ward off fungi, mold and mildew. MTI uses only 100% legal, FEQ (First European Quality) sustainable teak lumber. For select DoloMatte and Acrylic CXL bases. Custom sizes are available.

### SCULPTURESTONE® SHOWER BENCH

Versatile bench in engineered solid surface stone can be used inside or outside the shower. Available in a variety of lengths with either waterfall or parsons style legs; smooth, textured or teak inlay top; white or biscuit in a soft matte or hand-polished deep gloss finish.

### SCULPTURESTONE® SHOWER SEAT

Cleanly designed shower seat is constructed in engineered solid surface stone. Available in white or biscuit in a soft matte or hand-polished deep gloss finish. Includes arms for wall-mounting.

### RADIANCE®

A thermal therapy innovation provides an extra level of comfort to showering. The factory-installed, fully integrated low-voltage system applies radiant heat technology to the main shower floor area of Designer Collection shower bases. For DoloMatte and Acrylic CXL bases.
